

## PROJECT PROFILE

### Klöckner Pentaplast Plant Addition Beaver, WV

**PROJECT ARCHITECT:** The Thrasher Group, Inc., Bridgeport, WV  
**STRUCTURAL ENGINEERS:** Allegheny Design Services, LLC, Morgantown, WV  
**CONTRACTOR:** BurWil Construction Company, Inc., Bristol, TN

#### PROJECT SCOPE:

- An approximately 103,000 SF Production Expansion adding post-consumer recycled content (PCR) PET capacity in North America to the existing facility in Beaver, WV.
- The addition consisted of multiple expansion areas along with a 2-story office addition.
- The goal was to minimize the interior interference of structural elements, particularly columns.
- The expansion will further grow KP's sustainable innovation offering in consumer health, pharmaceutical, and food packaging markets through the addition of an extrusion line and two thermoformers, delivering a total of 15,000 metric tons of new rPET/PET capacity. KP currently produces over 20% of its materials made from PCR material.
- The West Virginia facility – located at 121 Blue Angel Lane in Beaver, WV was previously named as KP's Plant of the Year for productivity out of more than 30 factories worldwide.

**PROJECT VALUE:** \$24 Million

**PROJECT COMPLETION:** 2025
